Girder installation detours nighttime traffic on Highway 22X in Calgary

Calgary... A temporary nighttime traffic detour will be in effect next week on Highway 22X near the Cranston Boulevard/McKenzie Lake Boulevard interchange in southeast Calgary as part of the Southeast Stoney Trail Project.

Bridge girder installation will temporarily restrict the westbound lanes on Highway 22X just east of the Cranston Boulevard/McKenzie Lake Boulevard intersection. Eastbound and westbound traffic on Highway 22X will be reduced to a single lane in each direction. Minor stoppages of traffic on Highway 22X will occur only during bridge girder arrival. Traffic control personnel will be onsite.

This detour will be in effect from 10 p.m. to 6 a.m. October 24 – 26. *Please note dates are subject to change.*

This is the final bridge girder installation affecting the travelling public at this interchange. Photos of the first girder installation are available online.

Motorists should use caution in this area and obey all signs, message boards, and flag people. Fines for speeding are doubled in construction zones when workers are present.

The Alberta government signed a 33-year agreement with Chinook Roads Partnership to design, build, operate and partially finance the southeast leg of the Stoney Trail ring road from its junction with 17 Avenue SE, south along the City of Calgary's eastern limit, then west along Highway 22X to east of the Macleod Trail interchange. The new road will be fully open to traffic by the fall of 2013.
